

AMENDMENTS TO THE SPECIFICATION

Amend the specification paragraph starting on page 7, line 5, and ending on page 7, line 11, as follows:

The reception sleeve 12 defines a clip-on housing 103 which forms reception means for the body 20 of a distribution device 2, for example a pump. Conventionally, the housing 103 is designed to clip on a projecting reinforcement 21 formed by the body 20. The housing 103 allows the passage of an actuating rod 22, on which a thruster 23 is fitted. In addition, the sleeve 12 forms a plate 102 which extends radially outwards. The flange ~~121~~ 111 extends above the plate 102 of the bushing 11.
